U.S. Citizen

Education:

University of Texas at Dallas | *Bachelor of Science in Computer Science*

Graduated: December, 2025

Technical Experience:

Fidelity Investments | Westlake, Texas

February 2026 - June 2026

Software Engineer | Mutual Fund Engineering

- Developed enhancements for Fidelity's customer-facing mutual fund order entry platform, supporting mutual fund securities transaction workflow across 7 production releases through testing, validation, and deployment activities.
- Engineered a full-stack e-commerce application from scratch with modular service layers and APIs for authentication, user management, product catalog, and checkout workflows, emphasizing secure and scalable production-level e-commerce architecture.

Blue Cross Blue Shield (HCSC) | Dallas, Texas

June 2025 - August 2025

Developer Intern | Enterprise API Team

- Led the development of a scalable React.js application that surfaces internal team engagement metrics by building a custom API using MuleSoft and Excel-based data pipelines.
- Conducted threat modeling and risk assessments on internal API endpoints, mitigating potential injection and data exposure vulnerabilities.
- Integrated CI/CD pipelines and automated deployment processes for the dashboard, reducing release cycles by 40% and ensuring consistent delivery across staging and production environments.

SmartData Solutions | Dallas, Texas

August 2025 - December 2025

Software Engineer Intern | UTD Capstone

- Headed development of an AI-powered healthcare document workflow platform, implementing OCR-driven document analysis and natural-language querying to improve claims-related review efficiency by 35%+ in controlled testing.
- BBuilt a multi-stage pipeline integrating OCR, RAG-based Q&A, and analytics dashboards, achieving 98%+ field extraction accuracy and sub-10-minute ingestion-to-search latency on non-client test documents.

EPICS @ The University of Texas at Dallas | Richardson, Texas

August 2024 - December 2024

Software Engineer | Github and Discord Team

- Developed and implemented API integrations with Python and RESTful APIs, between the TeamBuilder app, Discord, and GitHub, streamlining the onboarding process for EPICS project teams each semester.
- Spearheaded the design and development of a web application module using React.js and Node.js, automating team assignments and improving operational efficiency.

Projects:

Project FINN | Python | Mycroft AI | Microsoft Azure TTS | Tesla API | Raspberry Pi

June - July 2024

- Designed and deployed an advanced AI assistant for Tesla which enables voice-activated queries, handling over 100 voice commands per day.
- Developed custom skills and integrated a bespoke Text-to-Speech engine which provides all round natural assistance
- Executed comprehensive system testing and optimization achieving 99% system reliability and reducing response times from 5 seconds to 3.5 seconds.

FinSights (Fin-Tech Hackathon) | React.js | TypeScript | NLTK | Visual Studio Code

April 2024

- Developed a financial dashboard which provides actionable insights through risk analysis and sentiment analysis leveraging NLTK to assess sentiment from financial news reports.
- Trained an AI model to calculate and provide an accurate risk score, based on real time market data and market sentiment.
- Integrated data visualization tools to convey investment risks and facilitate an easily comprehensible user experience.

Technical Skills:

Programming Languages:

- Java, Python, Swift, C++, Ruby, MIPS, JavaScript, HTML/CSS

Frameworks & Libraries:

- Spring Boot, Micronaut, React, Next.js, Angular, Vue.js, Node.js, Express.js, FastAPI, Flask, Axios, Pandas, NLTK, Selenium, JUnit, Mockito

APIs & Integration:

- REST APIs, GraphQL, gRPC, API Design, Microservices, MuleSoft, DataWeave, Postman, Swagger/OpenAPI, OAuth 2.0, JWT

Cloud & DevOps:

- AWS, Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD Pipelines, Linux/Unix, Terraform

Tools & Platforms:

- Git, GitHub, Jira, Confluence, IntelliJ IDEA, Visual Studio Code, Anypoint Studio, Figma, Raspberry Pi

Database & Systems:

- PostgreSQL, MySQL, MongoDB, Redis, Kafka, Database Management, Query Optimization

Specialized:

- Backend Engineering, Full-Stack Development, Distributed Systems, API Development, Cloud-Native Development, Performance Optimization, Machine Learning, Web Automation
